

Bachelor of Pharmacy Curriculum:

This is the curriculum for the four-year B. Pharm degree at Amoud University. Students may complete the pre-pharmacy curriculum at Amoud University or other accredited institutions of higher learning. Students must transfer 68 hours into the professional curriculum and complete 200 total hours to be eligible to graduate.

The Bachelor of Pharmacy (B.Pharm) curriculum provides students with course work and clinical preparation that is basic to understanding the diagnosis and treatment of diseases, and the therapeutic use, appropriateness, selection, monitoring, and cost-effectiveness of drugs. Students participate in a variety of learning opportunities that are necessary for educating and counseling patients, and for understanding and appreciating the social, emotional, and psychological implications of disease.

The B. Pharm Professional program fulfills the educational aspect of the requirements for licensure as a pharmacist. This full-time, four year program prepares students to practice in community or hospital settings, in technological or administrative positions in the pharmaceutical industry, and for some teaching positions in schools or colleges of pharmacy.

Introduction

Amoud University is a community-owned non-governmental, national University open to all aspiring candidates who fulfill the admission requirements without discrimination based on sex, ethnic, origin, creed, color or religion.

The idea of establishing Amoud University was conceived by four intellectuals working in the Gulf in 1994 and was formally proposed in a workshop held in Borama on August 6, 1996. The workshop agreed to the proposal and adopted a resolution for the establishment of the University by 1997.

Amoud University started its first admission examination on September 1997 and selected 66 students to undergo a nine-month intensive English course. The University commenced its undergraduate program on 4 November 1998 and admitted the first freshman class, setting a landmark in the history of higher education in this country.

Objectives of the School

One of the important concerns of the Faculty of Pharmacy is to provide the society with skilled pharmacy graduates who are capable of practicing in all modern pharmaceutical fields and dedicated to the betterment of health services.

This can only be achieved by the approach used by the Faculty of Pharmacy through offering an educational philosophy that promotes a combination of critical thinking and practical application.

Vision

The Faculty of Pharmacy, Amoud University, seeks to be distinguished internationally by providing up-to-date high quality pharmacy education and biomedical research, as well as by fostering continuing professional development and community involvement.

Mission

The Faculty of Pharmacy, Amoud University, is committed to ensure an educational environment that fosters progressive development in teaching, learning, training and research, to provide the health care system with pharmacists capable of meeting the challenges of the rapidly evolving pharmacy profession, and to establish an interactive partnership with the pharmaceutical industry and the community.

Strategy

- ◆ Most subjects are taught with a variety of methods including lectures, projected materials with lecturers notes presented to the students, practical work and seminars.
